Foreword

THIS REPORT continues the annual release of information on the geographic index of reimbursement by State and county under Medicare. The amounts reimbursed under the two parts of the Medicare program—hospital insurance and supplementary medical insurance—have been published annually by county since the inception of the program in July 1966. This is the fourth report to publish a derived ratio for each county, based on the reimbursement data standardized for the age and sex distribution of the county population. This ratio, a “geographic index,” provides a comparison of per capita county reimbursements under Medicare with the national average.

In previous years, reimbursements by State and county and the geographic index of reimbursement had been published in separate reports not included in this series. Beginning this year, 1972, these reports will be published as part of the annual Medicare series.

The concepts of the “geographic index” and the basic “age-sex index” were developed in the Office of the Actuary, and the tables prepared in the Bureau of Data Processing with the cooperation of the Office of Research and Statistics.

The Statistical System of the Medicare Program

THIS PUBLICATION is a section of a series of statistical reports produced from Medicare program records. Data are presented on a calendar year basis, describing services rendered in the year. The series includes sections on the number and characteristics of enrollees; on the characteristics of participating providers; on inpatient care in hospitals and skilled nursing facilities; on the use of outpatient hospital, home health, and physicians' and other medical services; and overall summaries.

The primary objective of these reports is to provide data to measure and evaluate program operation and effectiveness. Benefit payment operations furnish information about the amount and kind of hospital and medical care services used by persons aged 65 and over, as well as the expenditures for such services. The applications by hospitals, skilled nursing facilities, home health agencies, independent laboratories, and suppliers of portable X-ray and outpatient physical therapy services, to participate in the program provide data on the characteristics of such providers of services. The claim number assigned to each individual serves as the link between the services utilized under Medicare and the demographic characteristics of individual enrollees.

The data-collection system has two inherent characteristics that determine the scope, detail, and flexibility of the available statistics. First, the beneficiary and his medical experience under the program form the basic unit for which data are collected. Second, records for each bill paid under the program and records of diagnoses and surgical procedures for a sample of beneficiaries are maintained on a centralized basis. Except for intermediary operating statistics such as those relating to workloads, costs, and the like, all program statistics are prepared centrally.

THE BASIC RECORDS

The statistical system is based on five related computer records: the health insurance master file, provider record, hospital insurance (Part A) utilization record, medical insurance (Part B) payment record, and the record containing information from medical insurance bills of a sample of supplementary medical insurance enrollees.

THE HEALTH INSURANCE MASTER FILE

The health insurance master file identifies each aged person eligible for health insurance benefits and indicates whether he is entitled to hospital insurance benefits, to supplementary medical insurance benefits, or to both.

This record is used to create a health insurance card that is sent to each insured person. The card contains the individual's claim number (the number used for OASDI or railroad retirement programs). It indicates the entitlement of the individual for each of the two parts of the Medicare program.

The entitlement record provides the population data for each part of the program which serves as the base for the computation of a variety of utilization rates, limited only by its demographic content.

PROVIDER RECORD

Every hospital, home health agency, skilled nursing facility, independent clinical laboratory, and supplier of portable X-ray or outpatient physical therapy services must apply for participation in the Medicare program. Data on the application forms are stored in the central provider record and are updated as facilities are recertified periodically, as new ones apply for participation, or as some leave the program. When the information in this provider file is combined with utilization data, it serves to relate the characteristics of facilities and agencies that provide care to the kinds and amounts of service used by persons insured under Medicare.

UTILIZATION RECORD FOR HOSPITAL INSURANCE

The administration of the hospital insurance (HI) program requires that two items of information be known about each person at the time of his admission to a hospital—his entitlement under the program and the extent to which he has used the benefits available to him.

When the patient is admitted to a hospital, the admission section of the inpatient hospital admission and billing form is completed by the hospital and forwarded through its intermediary to the Social Security Administration's central record. As soon as the record is checked, normally in less than 24 hours, the intermediary is informed of the patient's benefit status and of the number of days of inpatient care to which he is entitled during his current "benefit period."

This information is then forwarded to the hospital. At discharge, the hospital completes the billing section of the form and sends it to the intermediary for payment. When payment is approved, the intermediary forwards the claim to the Social Security Administration for inclusion in the central record.

As part of this process, information on diagnoses and surgical procedures are coded for a 20-percent sample of beneficiaries based on specific combinations of digits in the health insurance claim number. Admission and billing forms are handled in a comparable manner by home health agencies and skilled nursing facilities. The outpatient billing form is also transmitted to the Social Security Administration for entry in the central record after the bill is approved for payment by the intermediary.

All the information on utilization experience in hospital and skilled nursing facilities that is needed to administer the "benefit period" provision is recorded centrally. This information includes stays in certain nonparticipating institutions that meet the definition of a hospital or skilled nursing facility under the law, and days of care not covered or reimbursable under the program.

Each admission and billing form contains both the beneficiary's claim number and the provider's identification number. The resulting record can be readily matched to the beneficiary files and the provider files. By this process, a statistical tape record is created for the sample of insured persons that contains all the available information needed for tabulation from the three files related to HI utilization.

PAYMENT RECORD FOR MEDICAL INSURANCE

Payment or reimbursement under the SMI program is made only after receipt by the carriers (intermediaries involved in Part B of the Medicare program) of bills with allowed charges in excess of \$50 during a calendar year.

For the enrolled population, carriers need to know from a central source the amount of the deductible that has been met; thereafter, during the remainder of the calendar year, the only additional information required from the Social Security Administration for reimbursement or payment purposes is whether the person is still enrolled under the SMI program.

For administration and operation of the program, the Social Security Administration must have accurate and complete information on the amounts paid by the carriers for physician services and for other services and supplies under this part of the program. To meet these needs, carriers furnish a payment record consisting of tape, punched card, or other machine-readable form of each bill paid. A "bill" is defined as a request for payment from or on behalf of a beneficiary as the result of services provided by a single physician or supplier.

THE MEDICAL INSURANCE SAMPLE

Although the payment record provides a rapid method for summarizing payment data, it does not provide specific data on diagnoses, procedures, and related charges.

Basic statistics on the utilization of physician and other services covered under the supplementary medical insurance program are derived from bills paid by intermediaries to or on behalf of a basic one-percent sample of SMI enrollees and a supplemental sample of 4 percent of enrollees receiving services as hospital inpatients. Carriers have been given specific combinations of digits of the health insurance claim number to be used in selecting the samples, which are subsamples of the 20-percent sample used for hospital insurance program data.

Bills are submitted either directly on an SSA request for payment form, or on the SSA form in combination with the physician's own billing form. Both methods are designed to provide information on the date and place of each service, the procedure carried out or service provided, the condition treated (diagnosis), and the physician's or supplier's charge for specific services.

All of the bills of persons in the sample to or for whom payment is made under the program including those used to meet the annual \$50 deductible, are included in the sample and coded. However, data are not available through these procedures for persons in the sample who do not meet the \$50 deductible. Such data are collected by means of the Current Medicare Survey, with data made available in a separate report series.¹

¹ Jack Scharff, "Current Medicare Survey: The Medical Insurance Sample," *Social Security Bulletin*, April 1967.

Provisions of the Law and Regulations

The Medicare program, enacted on July 30, 1965 as Title XVIII of the Social Security Act, became effective on July 1, 1966. The program makes available two separate but coordinated insurance coverages—hospital insurance, covering nearly all persons aged 65 and over, and supplementary medical insurance, covering those persons in this age group who enroll voluntarily and pay the premium. The law was amended during each year 1966–68, and again in 1972.¹ In particular, the 1972 amendments enacted on October 30, 1972 made important changes in the Medicare program. Changes which became effective prior to January 1, 1973, and which affect the data contained in this report are described below.²

Hospital Insurance Program

The hospital insurance (HI) program pays for part of the costs of inpatient hospital care and related health care services provided by skilled nursing facilities (formerly termed extended care facilities) and home health agencies following a period of hospitalization. For the services to be covered, they must be provided by institutions and organizations which have been certified as qualified providers of services and which have signed an agreement to participate in the program.³ An exception exists under special provisions for hospitals certified to provide only emergency services.

The law provides maximum limits on the services which may be covered under the HI program. These limits are based on the concept of a “benefit period.” A benefit period begins with the first day of hospitalization and ends when the individual has not been a bed patient in a hospital or skilled nursing home for 60 continuous days.

Requirements for payment by the individual of an inpatient hospital deductible and coinsurance amounts also are established by law. The Secretary of Health, Education and Welfare is required to determine the deductible amount between July 1 and October 1 of each year with the new deductible applicable during the succeeding calendar year. The amount must be computed by multiplying the ratio of the current average hospital per diem rate (under the program) to the per diem in 1966 by \$40, and rounding the amount to the nearest multiple of \$4. The inpatient hospital coinsurance amount must equal one-fourth of the deductible (one-half of the deductible for life-time reserve days) and the coinsurance for skilled nursing facility services must equal one-eighth of the deductible.

¹ P.L. 89-384 enacted April 8, 1966; P.L. 89-713 enacted Nov. 2, 1966; P.L. 90-97 enacted Sept. 30, 1967; P.L. 90-248 enacted Jan. 2, 1968; P.L. 92-336 enacted July 1, 1972; P.L. 92-603 enacted Oct. 30, 1972.

² For further information about Public Law 92-603, see *Summary of Social Security Amendments of 1972*, Joint Publication of the Committee on Finance, U.S. Senate, and Committee on Ways & Means, U.S. House of Representatives, Nov. 17, 1972.

³ For certification requirements see Medicare: *Health Insurance for the Aged, 1968. Section 3: Participating Providers*, Office of Research and Statistics, SSA, Nov. 1971.

Inpatient hospital benefits.—Covered hospital services include room and board in accommodations containing from two to four beds, nursing services (except for private-duty nursing), drugs and biologicals, and all those services ordinarily furnished by a hospital to its inpatients. The program does not cover the services of physicians (including staff radiologists, anesthesiologists, pathologists and psychiatrist) except for services provided by interns or residents under approved teaching programs.

The program pays for the “reasonable costs” of covered services in a participating hospital for up to 90 days in a “benefit period.” Full payment is made for the first 60 days of hospitalization less the deductible of \$68 for services received in benefit periods starting in 1972. For each of the remaining 30 days in the benefit period, the patient pays a coinsurance amount of \$17 a day.

Each hospital insurance beneficiary also has a “lifetime reserve” of 60 additional hospital days which can be used at his option whenever he has exhausted the 90 days covered in a benefit period. Lifetime reserve days are subject to a copayment of \$34 a day.

The cost of the first three pints of blood (or equivalent amounts of packed red blood cells) furnished a patient during a benefit period is also deductible unless the patient arranges for replacement. Charges for any additional blood are covered under the program.

The program also pays for emergency services in a non-participating hospital. Each nonparticipating hospital providing emergency services elects whether to claim payments from the Medicare program for emergency services rendered beneficiaries in a given year. If the hospital elects to bill the program, reimbursement is made as described above. In other cases, the beneficiary claims direct payment and submits the itemized bill to Social Security Administration. In this case, reimbursement is based on reasonable charges for covered services and amounts to 60 percent of reasonable charges for room and board plus 80 percent of such charges for ancillary services. Payment is subject to the deductible and coinsurance provisions of the law.

Hospital insurance benefits also include reimbursement for inpatient tuberculosis and psychiatric hospital services. However, there is a lifetime limit of 190 days of care in a psychiatric hospital. Where an individual is a patient in a participating psychiatric hospital at the time he becomes entitled to hospital insurance, the number of days he was such an inpatient in the 150-day period immediately prior to his eligibility are deducted from his days of entitlement to inpatient psychiatric care in that benefit period but not from the lifetime limitation.

Skilled nursing facility benefits.—Covered extended care services furnished by a skilled nursing facility (SNF) may include nursing care; bed and board; physical, occupational or speech therapy; drugs and biologicals; medical services of an intern or resident-in-training of a hospital having a transfer agreement with the SNF; and other necessary health care services generally provided by such facilities.

The program pays for the reasonable costs of all covered inpatient services in participating SNF's for up to 100 days

in a benefit period. Benefits are payable only following discharge from a hospital after a stay of 3 consecutive days or more; and prior to the 1972 amendments admission to the facility had to occur within 14 days of hospital discharge. With the enactment of the amendments on October 30, 1972, there may be exceptions when the patient's condition or a shortage of beds affect the admission date. Full payment is made for the first 20 days. For each of the remaining 80 days, the patient pays a coinsurance amount of \$8.50 a day (one-eighth of the inpatient hospital deductible) as required by law.

Post-hospital home health benefits.—Covered home health services may include part-time or intermittent nursing care; physical, occupational or speech therapy; part-time or intermittent services of a home health aide; medical supplies (other than drugs and biologicals) and the use of medical appliances; and, in certain cases, services of an intern or resident-in-training of a teaching hospital. The services must be furnished by or under arrangements of an approved home health agency.

Coverage under HI provides for payment of the reasonable cost of up to 100 home health visits after the beginning of one benefit period and before the beginning of the next. In addition, the visits must occur in the year, following a beneficiary's most recent discharge from a hospital stay of at least 3 consecutive days or from a covered SNF stay. A home health plan must be established by the patient's physician within 14 days after the hospital or SNF discharge. The home health services must be necessary for further treatment of a condition for which the patient received services in the hospital or SNF.

Supplementary Medical Insurance Program

The supplementary medical insurance (SMI) program provides coverage for a variety of medical services and supplies furnished by physicians or others in connection with physicians' services; outpatient hospital services; and home health services. Individuals 65 years of age and over may enroll in the program regardless of whether they are eligible for monthly social security benefits. Premiums are paid by or on behalf of all enrollees, and are matched by the Federal government from general revenues.

BENEFITS

Physicians' services covered under the program include home, hospital, and office visits. The program also pays for other services and supplies, such as: drugs and biologicals that cannot be self-administered if they are furnished as a part of a physician's professional service; diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests; X-rays, radium, and radioactive isotope therapy, including materials and the services of technicians; surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations; purchase or rental of durable medical equipment such as oxygen tents, hospital beds, and wheelchairs used in the patient's home (including an institution used as his home); ambulance service where the use of other methods of transportation is contraindicated by the individual's condition; prosthetic devices (other than dental) that replace all or part of an

internal organ; leg, arm, back, and neck braces; artificial legs, arms, and eyes, including replacement if required because of a change in the patient's physical condition; and home health visits provided by a certified home health agency in accordance with a home health plan established by the patient's physician (no prior hospitalization is necessary). Payment may be made for up to 100 home health visits in a calendar year without regard to similar services received under the HI program.

Also covered are hospital services incident to physicians' services rendered to outpatients, and outpatient physical therapy services.

In each calendar year through 1972 a deductible of \$50 must be satisfied before payment may be made under the SMI program (with two exceptions noted below). Bills count toward the deductible on the basis of incurred rather than paid expenses; only charges allowed under the program count towards the deductible. To preclude the possibility of a beneficiary having to meet a deductible twice in a short period of time a "carryover" provision is applied. Accordingly, covered expenses incurred in the last quarter of the year and applied to the deductible in that year are also credited toward the deductible for the following year.

After the deductible has been met, the SMI program pays for 80 percent of the allowed (reasonable) charges for covered physician services and most other medical services. However, deductible and coinsurance requirements do not apply to the services of radiologists and pathologists furnished to hospital inpatients. "Reasonable" charges for such services are completely reimbursed. Where an independent laboratory bills patients directly and accepts assignment, the Secretary is authorized to negotiate a payment rate with the laboratory for the diagnostic test it provides Medicare beneficiaries (effective October 30, 1972). Reimbursement on assigned bills is made at 100 percent of the negotiated rate; the deductible and coinsurance requirements do not apply. Hospital services incident to outpatient care, and home health services are subject to the deductible and are reimbursed on the basis of 80 percent of reasonable costs.

The law sets special limits on the payment which may be made for outpatient treatment of mental illness; recognition of incurred expenses is limited to the lesser of \$312.50 or 62.5 percent of actual expenses in a calendar year. Since only 80 percent of allowed charges may be reimbursed, the effect is to limit payment to \$250 or 50 percent of the allowed charges in any year after the deductible has been met, whichever is less.

Eligibility

Hospital insurance.—Almost all persons aged 65 and over are eligible for benefits under the hospital insurance program. Included are those persons who are entitled to monthly social security cash benefits or payments from the railroad retirement system. Further, a special transitional provision provides eligibility for certain persons who do not qualify for monthly cash benefits on the basis of their own wage record or as a dependent or survivor of an insured worker. The provision applies, generally, to a person aged 65 or over who (1) attained age 65 before 1968 or (2) attained age 65 after 1967 with not less than

three quarters of social security coverage, whenever acquired, for each calendar year elapsing after 1966 and before the year in which he attains age 65. For persons who reach age 65 after 1968, the amount of work credits (quarters of coverage) needed increases by three quarters each year—six quarters are needed by those who reached age 65 in 1969, nine by those who reached age 65 in 1970 and so on.

Federal employees who retired from the Federal service after July 1, 1960, and who had the opportunity to be covered under the Federal Employees Health Benefits Act of 1959, are ineligible for hospital insurance benefits under the transitional provisions. Also ineligible are aliens with less than 5 years of continuous residence in the United States, and those persons convicted of crimes against the security of the United States.

Hospital insurance protection can be retroactive for as many as 12 months before the month an individual files his application for entitlement. For example, an individual may apply 11 months after he attains age 65 and still be entitled to benefits from the month he attained age 65.

Supplementary medical insurance.—Persons entitled to benefits under the hospital insurance program, retired federal employees, and persons not eligible for hospital insurance under the transitional provisions may voluntarily participate in the SMI program.

Enrollment.—Individuals may enroll in the SMI program only during specified periods—the initial and the general enrollment periods. The initial enrollment period begins with the third month preceding the one in which an individual attains age 65 and ends 3 months after the month of attainment, a total period of 7 months. If he enrolls during the 3 months prior to the month in which he attains age 65, his coverage is effective with the month in which he attains age 65; if he enrolls during the month he attains age 65, his coverage begins the following month; if he enrolls in any of the 3 months after he attains age 65, his coverage begins from 2 to 3 months after enrollment, depending on how long he waited before enrolling.

Beginning with 1969, there are general enrollment periods from January 1 through March 31 of each year for those who did not enroll in their initial enrollment period, or who previously terminated their enrollment and wish to re-enroll. For 1969 and later years, a person who enrolls during a general enrollment period is covered under SMI beginning with July 1 of the year in which he enrolls. Prior to the 1972 amendments, an eligible individual had to enroll within 3 years after the end of his initial enrollment period or within 3 years after termination of prior enrollment. The 3-year limitation is no longer applicable. Re-enrollment is allowed only once.

A State may enroll otherwise eligible individuals who receive cash payments under public assistance programs or are otherwise eligible for medical assistance under Title XIX if: a) prior to January 1, 1970 the State requested that a State-Federal enrollment agreement be established; and b) the State pays the necessary premiums.

Enrollment terminates with the beginning of the month following the month of death. Otherwise, social security and railroad retirement beneficiaries may give notice of their desire to withdraw from the SMI program at any time, and their coverage is terminated at the close of the

following calendar quarter. Other enrolled persons may terminate their coverage by withholding payment of premiums or by notifying the Social Security Administration in writing of their desire to withdraw from the program. The enrollee is provided a 90-day grace period for the payment of overdue premiums after which coverage is automatically terminated.

Financing the Program

Hospital insurance.—The hospital insurance program is financed primarily through a schedule of increasing tax rates on a portion of current earnings in employment covered under the Social Security Act. The maximum amount of annual earnings to which the rates are applied began at \$6,600 for calendar year 1966; it increased to \$7,800 effective with 1968 and \$9,000 beginning with 1972. The 1972 amendments established an additional schedule of increases to \$10,800 for 1973, and \$12,000 for 1974 with future automatic increases as wages rise.

The same tax rate applies to employees, employers, and self-employed persons. The rate has been 0.60 percent for each year 1968–72. The scheduled rate for 1973–77 is 0.90 percent, and rates increase for future years up to 1.2 percent for 1993 and thereafter. The proceeds of this tax, and monies collected from the railroad retirement system (with respect to the coverage of railroad retirement beneficiaries) are placed in a Hospital Insurance Trust Fund from which reimbursement for all benefits and administrative expenses incurred under the hospital insurance program is made. The Hospital Insurance Trust Fund is reimbursed from general tax revenues for the cost of providing coverage for the persons who qualify for hospital insurance under the transitional provisions. For January, 1972 there were about one million such persons, a decrease from the 2.6 million who so qualified in 1966.

Supplementary medical insurance.—Premiums are paid into the Federal Supplementary Medical Insurance Trust Fund by those persons enrolled for supplementary medical insurance (or on their behalf), and a matching amount is paid by the Federal government from general revenues. Benefits and administrative costs are paid from monies in the SMI Trust Fund.

The premiums of persons receiving social security cash benefits, railroad retirement, or Federal Civil Service annuities are deducted from their monthly benefit checks. Persons not receiving monthly benefits are billed quarterly for premiums by the Social Security Administration or the Railroad Retirement Board and have a 90-day grace period in which to make payment. Premiums may be paid for as long as a year in advance. For individuals financially unable to make quarterly payments, arrangements can be made for monthly payments.

Amount of premium.—The Secretary of HEW is directed by law to determine the SMI premium rate on an annual basis. The dollar amount is required to be sufficient to produce revenue equal to one half of the expected benefit and administrative costs payable under SMI during the period for which the premium rate applies. The rate is determined in December of each year and is applicable for 12 months beginning with the following July.

The premium rate in the first half of 1972 was \$5.60 per month. The rate was raised to \$5.80 effective July 1972.

Administration of the Program

Hospital insurance.—Under the hospital insurance part of the program, groups or associations of providers, on behalf of their members, may nominate a national, State, or other public or private agency or organization to serve as intermediary in the claims process. A member of an association is free, however, to receive payment from an approved intermediary other than its association's nominee, if approved by the Secretary and agreeable to the intermediary selected. In addition, a provider may deal directly with the Social Security Administration.

The Secretary may enter into an agreement with a nominated organization if he finds this to be consistent with effective and efficient administration of the hospital insurance program. Under the agreement, the intermediary determines the provider's reasonable costs for items and services covered under the program; makes payments, and assists in the application of safeguards against unnecessary utilization of covered services. The agreement may also call for (1) furnishing consultative services to assist providers to establish and maintain necessary fiscal records and otherwise qualify as providers of services, (2) serving as a center for communicating with providers, and (3) making audits of provider records. Hospital insurance intermediaries also make payments for home health and outpatient hospital services covered under medical insurance.

Under the law, the reasonable cost of services is determined pursuant to regulations established by the Secretary of HEW. These regulations prescribe the method(s) which are used to determine costs, and the items to be included; they take into account both direct and indirect patient care costs.⁴ Reimbursement for services rendered in 1972 also is subject to regulation by the Price Commission.⁵ To implement requirements established by the Price Commission, and after coordination with other involved agencies, the Social Security Administration established standards under which an intermediary may presume compliance by a provider with economic stabilization regulation. In order for an intermediary to presume compliance, two conditions must be met: (a) the provider must certify to its compliance with economic stabilization regulations, and (b) the provider's Medicare reimbursable costs (i.e. reasonable costs as determined under Medicare requirements) must be within certain specified levels: no more than 109 percent of the institutional provider's or 105.5 percent of the noninstitutional provider's total Medicare reimbursement for its previous reporting year under the program, expressed on an appropriate unit of service basis (i.e. reimbursement per inpatient day, visit, or occasion of services). Where an intermediary cannot presume compliance, the provider is referred to the district director of Internal Revenue for a determination regarding the allowability of cost increases under the economic stabilization regulations.

Requests for Medicare payment for covered services generally are submitted by the provider of services; they must be signed by the beneficiary (or someone for him, if

he is unable to do so). The provider is reimbursed on the basis of reasonable costs of covered services and bills the beneficiary for deductible and coinsurance amounts as well as for services not covered by the program.

In some instances, hospitals may bill the program on a physician's behalf for physician services rendered to inpatients. In these cases, payment is made by the HI intermediary. For this type of billing, funds are transferred from the SMI trust fund to the HI trust fund to cover the cost of these services.

The intermediary selected by the provider reviews claims for payment and pays the provider. Actual payment for individual claims is made on the basis of an interim rate established between the provider and the intermediary. Final settlement for each provider's operating year is made on the basis of a cost report submitted by the provider, and subject to an independent audit.

No payment can be made to Federal facilities except for emergency services, unless the provider serves as a community institution. In addition, payment cannot be made to a provider for those services it is obligated to render at public expense under Federal law or contract.

Supplementary medical insurance.—Under the medical insurance program, the Secretary of Health, Education and Welfare may enter into contracts with carriers for the performance of specified administrative functions. The carrier's principal function is to determine whether charges are allowable (reasonable) and to make payment. Carriers also have the authority and responsibility to determine, in a given case, whether a claim is for a covered service and to deny claims for noncovered or excluded items or services. In addition, carriers are to assist in the application of safeguards against unnecessary utilization of services.

The allowable charge, on which Medicare Part B payment is based, may not exceed the lowest of (1) the physician's or supplier's customary charge for the service, (2) the prevailing charges in the locality for similar services, or (3) the charge applicable for comparable services under comparable circumstances to the policy-holders or subscribers of the carrier.

Allowable charges are updated annually to take into account the actual charges physicians and suppliers have billed for covered services in the immediately preceding calendar year. The revised allowable charge levels go into effect on July 1 of each year or as soon thereafter as they can be incorporated into the carrier's payment system. Thus, for the 12-month period beginning July 1, 1971, allowable charge levels were calculated from actual charge levels for calendar year 1970. However, allowable charges could not exceed the upper limit of the prevailing charges set by regulation at the 75th percentile of customary charges (weighted by frequency) made for similar services.

For the 12-month period beginning July 1, 1972, the allowable charge levels are calculated from actual charge levels for calendar year 1971. However, because of a ruling by the Price Commission, only 40 percent of these calculated increases in allowable charge levels can be recognized for the 12-month period beginning July 1, 1972.

The ruling of the Price Commission is that the Medicare allowable charges in effect on November 13, 1971, must be considered as base prices for Phase II purposes, and that, as a result, they may not be increased by more than 2.5

⁴ For details see 20 CFR, Chapter III, Part 405, Subpart D.

⁵ Six CFR, Chapter III, Part 300, Subpart A.

percent in the aggregate during the fiscal year beginning July 1, 1972. Based on actual increases in physician and supplier billings in calendar year 1971, the charges allowed under the Medicare program for the 12-month period beginning July 1, 1972, would have been increased by about 6.2 percent in the aggregate. To implement the Price Commission's ruling, therefore, only 40 percent (2.5 is about 40 percent of 6.2) of the increases that would ordinarily have been allowed will be recognized in calculating allowable charges for the fiscal year beginning July 1, 1972.

Claims for payment of SMI benefits may be submitted to the carrier either by the patient or by the physician or other supplier of services. If the patient submits a claim (an itemized bill) directly to the carrier, he receives direct payment of benefits for covered services; he remains responsible for the physician's (or supplier's) bill. The patient may assign the benefits to a physician or other supplier of services who is willing to accept assignment. In this case, the physician (or supplier) agrees that the allowed or reasonable charge determined by the carrier is the total charge. The physician (or supplier) submits the

bill and is reimbursed. In this situation, the patient remains responsible for the remaining 20 percent of the allowed charges for covered services and the \$50 deductible (if applicable to the current bill).

Services furnished by group practice prepayment plans (GPPP) to members are normally rendered in return for predetermined premium payments. In these cases Medicare reimbursement is made directly to the GPPP. A GPPP which exercises the option provided by law to be paid 80 percent of the reasonable cost of services (in lieu of 80 percent of the allowed charge for such services) generally deals directly with the Social Security Administration. Plans which choose to be paid on the basis of allowed charges are reimbursed by the SMI carrier.

For bills incurred in the supplementary medical insurance portion of the program after March 1968, claims must be filed no later than the close of the calendar year following the year in which the services are furnished. For services provided during the last 3 months of the calendar year, bills may be submitted through the end of the second year following.

Medicare: Geographic Index of Reimbursement by State and County, 1972

The Medicare program was enacted on July 30, 1965, as Title XVIII of the 1965 Social Security amendments (Public Law 89-97) and became effective July 1, 1966. The program makes available two separate but coordinated coverages—hospital insurance (HI), covering nearly all persons aged 65 and over, and supplementary medical insurance (SMI) covering those persons in this age group who enroll voluntarily and pay the required premiums.

Annually, amounts reimbursed under the program for enrolled persons in each State and county have been published for both parts of the program. The present report, based on the reimbursement data for 1972, presents a method of comparing the level of per capita reimbursement in each county with that for the country as a whole, as well as with other counties, by means of a geographic index.

Computation of the Index

The objective of the index is to associate with each county a "geographic index of reimbursement" (shortened to "geographic index" in tables 1-3). An index of, say 1.320 for county A and an index of 1.200 for county B would indicate that, independently of the effects of age and sex, the net resultant of all the other influences on reimbursement is a per capita reimbursement level in county A which is 110 percent of the per capita reimbursement level in county B.

In each calendar year the geographic index for "All Areas" is made equal to one so that the county geographic index for that year shows the ratio of the county per capita reimbursement in that year to that of "All Areas." An increase from one year to the next in a county's index does not, of itself, indicate an increase in per capita reimbursement. It indicates only an increase in the *ratio* of the county's per capita reimbursement (adjusted for age and sex) to the corresponding "All Areas" figure.

The influences of age and sex should, if possible, be removed from the geographic index. This is done by

first, calculating each year for each area an age-sex index. The index measures the extent to which average reimbursement per enrollee in two different areas (or in the same area in two different years) should differ from each other purely because of differences in the proportionate distribution of enrollees by age and sex.

A "standard" relative reimbursement for 5-year age groups for each sex separately was first established by inspection of available data on average reimbursements per person enrolled for "All Areas." The "standards" chosen were rounded, for use in the index computation. A comparison with actual relative reimbursements for 1969 is shown in table A.¹

The method of computing the age-sex index for an area is shown in table B, where it is computed for Alabama. The age-sex index for the area is an average figure reflecting whether it has relatively more, or fewer, persons in the age-sex groups which have a high "standard" relative reimbursement. If one area age-sex index is, say 1.020 and another is 1.002, this means reimbursements per person in the first area would be expected to run 1.018 times those in the second area purely because of differences in the distribution of enrollees by age and sex.

The age-sex indices are designed so that the "All Areas" figure will be in the vicinity of unity. Nevertheless, the figures are independent of any one year's experience. Using the most recently available data, the "All Areas" age-sex indices are:

Year	Hospital Insurance	Supplementary Medical Insurance
1967 -----	0.998	1.002
1968 -----	1.002	1.003
1969 -----	1.005	1.004
1970 -----	1.008	1.005
1971 -----	1.011	1.006
1972 -----	1.013	1.006

¹ For 1969 data, see Office of Research and Statistics, U.S. Social Security Administration, *Medicare: Health Insurance for the Aged, 1969, Section 1, Summary* (Washington, D.C.: U.S. Government Printing Office), 1975.

These indices provide a gross measure of the extent to which the average per capita reimbursement under the Medicare program changes from year to year because of annual changes in the distribution by sex and age of persons enrolled under the program.

The geographic index is the ratio of the per capita reimbursement for a specific area to that for "All Areas" after both figures have been age-sex adjusted. Thus, for Alabama, in 1972:

	HI	SMI
1) Total reimbursements	\$66,751,049	\$26,812,124
2) Reimbursement per person enrolled	\$ 195.94	\$ 80.13
3) Age-sex index (table B)	1.003	.998
4) Age-sex adjusted reimbursement per person enrolled, (2 divided by 3)	\$ 195.35	\$ 80.29

For "All Areas" in 1972:

	HI	SMI
1) Reimbursement per person enrolled	\$ 276.37	\$ 107.30
2) Age-sex index (page 1)	1.013	1.006
3) Age-sex adjusted reimbursement per person enrolled, (1 divided by 2)	\$ 272.82	\$ 106.66

The Geographic Index then, for Alabama is the ratio of its adjusted reimbursement to that for "All Areas," or

	HI	SMI
	\$ 195.35	\$ 80.29
	272.82	106.66
=	.716	.753

Source of Data: Qualifications and Limitations

This report uses for each county the enrolled populations and the reimbursement amounts published in an earlier release.² The calculations of the age-sex index for each area used enrolled populations as of July 1, 1972 for each county by age and sex contained

in unpublished tables on file with the Office of Research and Statistics. The enrolled populations by age and sex are published only for political subdivisions larger than a county.³

Qualifications and limitations of the data, as well as the provisions of the Medicare law, are contained in the reimbursement and enrollment reports. Attention is drawn especially to the following:

1. a. Reimbursements are associated with the area in which the covered person resides rather than the area in which the services are rendered.
- b. The statistics refer only to persons 65 and over covered for Medicare benefits and only to amounts paid for those benefits. Geographic indices for younger persons and other benefits would not be the same.
2. In any one calendar year, the relative difference between reimbursements as used for this report and the cost of services rendered in that year can vary considerably from county to county. For any one county, however, the plus and minus differences on this account should balance each other over the years.
3. The geographic indices reflect the composite effect of all those influences, other than age and sex, which produce variation in the per capita reimbursement for medical care. The price unit of care, for instance, is but one of many such influences; the availability of services is another.

Tables

Notes

Health insurance for the aged.—The program, commonly known as Medicare, that pays for part of the cost of hospital and medical services for participating persons aged 65 and over.

Geographic Index }
Age-Sex Index } See text.

Reimbursement per person enrolled.—Based on reimbursement amounts, and mid-year enrollment shown in an earlier report, *Reimbursement by State and County, 1972*. These figures are not adjusted.

Geographic classifications.—Based on the address to which the enrollee's cash benefit check is being mailed. For persons not receiving such benefits, the mailing address given at the time they applied for health insurance benefits is used. Temporary or permanent changes of residence are reflected in the data to the extent that such changes are reported to the SSA by enrollees.

All Areas: Consists of the United States, Guam, Puerto Rico, Virgin Islands, all other areas, and foreign countries.

United States: Consists of the 50 States, the District of Columbia, and residence unknown.

All Other Areas: Consists of American Samoa, the Canal Zone, Canton Island, Caroline Islands, Mariana Islands, Marshall Islands, Midway Islands, and Wake Island.

County: The primary divisions of the 50 States are, in general, counties. In Louisiana, however, these divisions are known as parishes. Alaska is divided

into 21 economic areas, included here as the equivalent of counties. A number of cities that are independent of county organizations are reported separately in Maryland, Missouri, and Virginia. The divisions in Puerto Rico are called municipalities. The District of Columbia, Guam, and the Virgin Islands are not further subdivided.

Metropolitan and nonmetropolitan counties: The division of counties into metropolitan and non-metropolitan groups is based on the list of standard metropolitan statistical areas (SMSA) as classified in 1970 by the Office of Management and Budget. Except in New England, each SMSA includes a county containing a central city of at least 50,000 inhabitants, based on the 1970 census. In addition, contiguous counties are included in the SMSA if they meet certain criteria of economic and social integration with the central city. In New England, an SMSA consists of towns and cities, rather than counties. However, the data included in this report were available only for counties. Therefore, for New England, the SMSA was replaced by the State metropolitan economic area (SMEA), which is defined in terms of whole counties.

Metropolitan counties are those counties included in an SMSA or an SMEA. These counties were further divided into those containing at least part of the central city of the SMSA and those not containing any part of the central city. Non-metropolitan counties are all counties not included in some SMSA or SMEA.

Metropolitan counties are identified by the number of the standard metropolitan statistical area of which they are a part, the number is followed by a C for the central city county.
